Join us in celebrating Raziah's incredible transformation after a life-changing liver transplant. Her story inspires hope on this International Women's Day.

"Looking back at my journey, it's hard to believe how far I've come. Liver failure cast a dark shadow over my childhood. My skin was always dry and itchy, and the itch was unbearable to the point that I used to scratch till I bleed. I struggled to stay awake in school, and the fatigue and discomfort hindered my ability to learn. My life transformed at 11 years old when I underwent a life-changing liver transplant. Since then, I'm able to work, get married and have three kids. Thank you National University Centre for Organ Transplantation (NUCOT) team for giving me a second chance at life!" – Raziah, liver transplant recipient.

As Singapore's only provider of adult and pediatric transplant services, NUCOT has been continuously innovating and improving patient outcomes since 1970. To learn more, visit for.sg/nucot.
